

Power Curtain

A solution that offers many advantages and has a flexibility that matches many other products. The Power Curtain is very usable, for example in car repair shops, or industrial areas when you want to divide the area into several booths.

The electric curtain is delivered in a complete kit ready to be installed on a wall or at a ceiling. The motor comes with a control box for up and down mode (manual operation).

A radio remote control is available as an option, up to 4 curtains can be operated simultaneously by the same remote control unit.

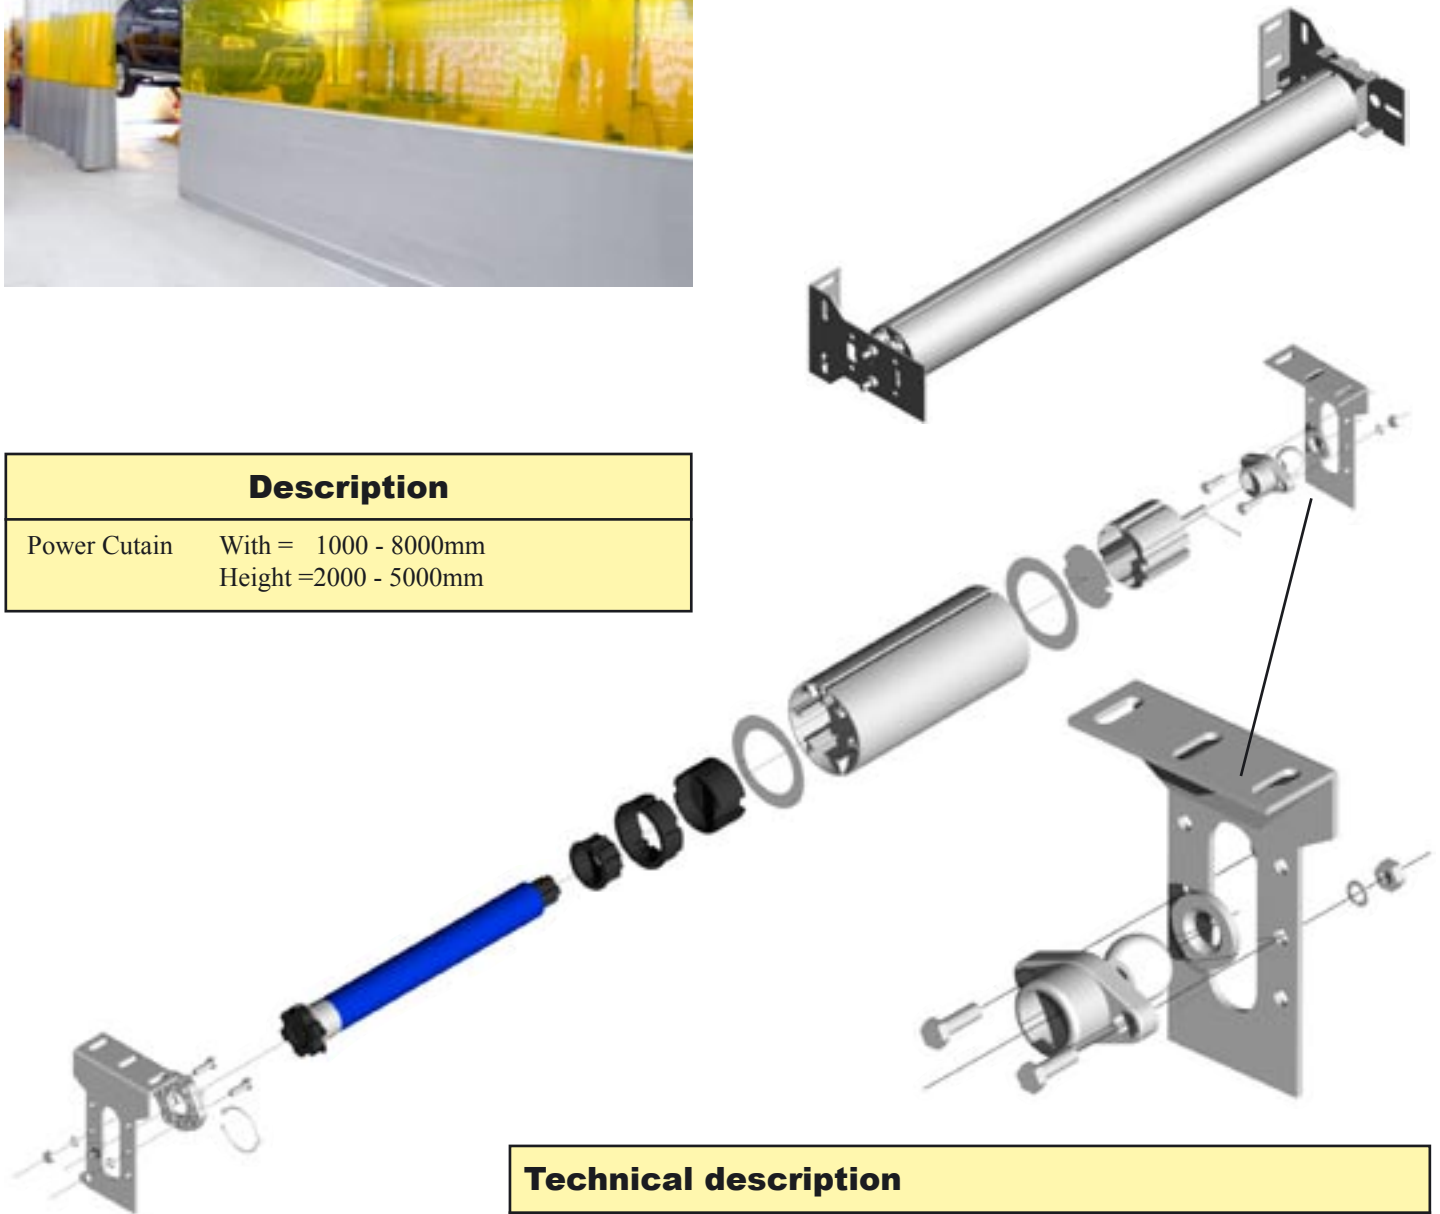

Screening

We can offer you several designs on the curtain, opaque or a combination of opaque and transparent curtain material.

Description

Power Curtain	With = 1000 - 8000mm Height = 2000 - 5000mm
---------------	--
